

for Smooth parking experience

NEED FOR MULTILEVEL CAR PARKING

- ▶ India is home to 1.4 billion people and growing, and as the country's economy continues to develop, the number of vehicles on the road is growing rapidly. With this rise in traffic, there is also an increase in the number of parking problems faced by cities across India. From crowded streets and parking spaces to illegal parking and poor enforcement, parking issues affect both public and private sectors.
- ▶ The situation is further compounded by Indian cities' sprawling geography, limited availability of land, and inadequate infrastructure. Given the various challenges, need for a comprehensive parking strategy is more important than ever to help ensure smooth flow of traffic to alleviate the parking woes faced people across India.
- ▶ Due to a rapid increase in population and urbanization, the number of vehicles on Indian roads has risen dramatically. This has resulted a sharp increase in the demand for parking spaces, leading to a severe shortage of available parking spaces in most major cities.
- ▶ To cater these needs, we are into this vertical where we provide parking solutions as per the requirement. Some of our offerings include the below products:

STACK PARKING SYSTEM

Stack parking refers to a type of parking system where vehicles are parked in a vertical stack, one on top of the other often installed on ground or in basements.

FEATURES :

1. Easy to operate
2. Sensor for Vehicle sensing
3. Less Maintenance
4. Front Stopper for Car
5. Individual Power Pack available
6. Available in various sizes as per requirement

TOWER PARKING SYSTEM

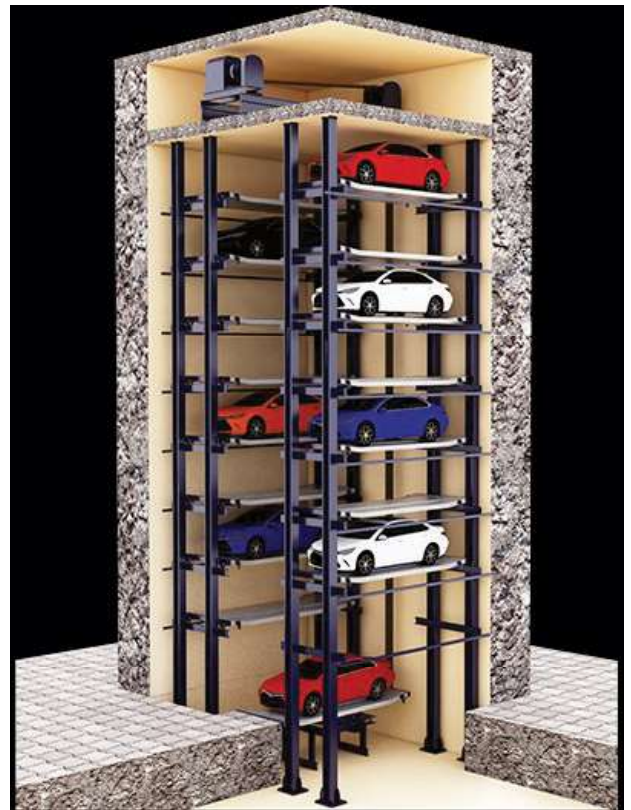

Tower parking is a type of parking system where vehicles are parked in a vertical stack, using a mechanical lift or elevator to move vehicles to different levels.

Benefits :

1. Space efficiency
2. Increased parking capacity

Features :

1. Optimum utilization of space
2. Sensors for safety and orientation of car
3. Can be customized as per requirement
4. Easy maintenance

PUZZLE PARKING SYSTEM

Puzzle parking is a type of parking system where vehicles are parked in a compact, puzzle-like arrangement, using lifts and shuttles to move vehicles to optimize space.

Benefits :

1. Reduced land use
2. Increased Parking Capacity
3. Reduced Traffic Congestion

Features :

1. Fully Automatic system
2. Reduced operation time due to multiple entries
3. Sensors for safety
4. Optimum utilization of space

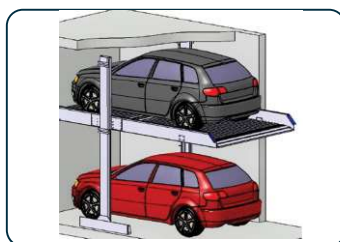

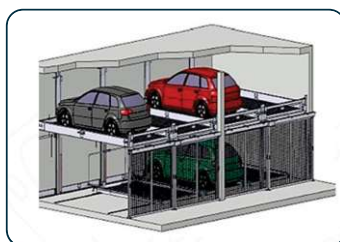

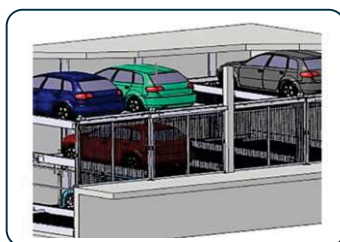

ABOUT US

Parkplex Solutions Pvt Ltd is a cutting-edge parking solutions company that provides innovative, efficient, and secure mechanical parking solutions for various industries and individuals. With a focus on technology-driven services, Parkplex aims to revolutionize the parking experience, ensuring seamless, hassle-free, and optimized parking solutions.

We have a team of seasoned experts with over 14 years of experience in multilevel car parking solutions. Building on this experience, we provide a comprehensive range of mechanical car parking systems that blend economy with seamless functionality.
